
A
a jump process and its coarse observables
W
μ
s
fast
slow
τx
τz
τW
log relaxation time
B
a bundle of conditional ensembles
$\mathcal{E}_W$
perception
learning
σ_u
σ_0
$\mathcal{W}$
C
prediction error: a centred tangent
$\varepsilon_\mu = \mu - L(\theta)$
f
x3
$\mathbb{E}_p[f]$
p
x2
x1
$f - \mathbb{E}_p[f]$
p_t
D
a coupling is dual to a correlation
$C = \partial_W \psi = \mathbb{E}[s\mu], \quad g = \partial_W C$
ψ(W)
g
C
W
